

Project Executable Files

Date	3 July 2026
Team ID	SWTID-2026-8076
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for your project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy your solution using the provided files and instructions.

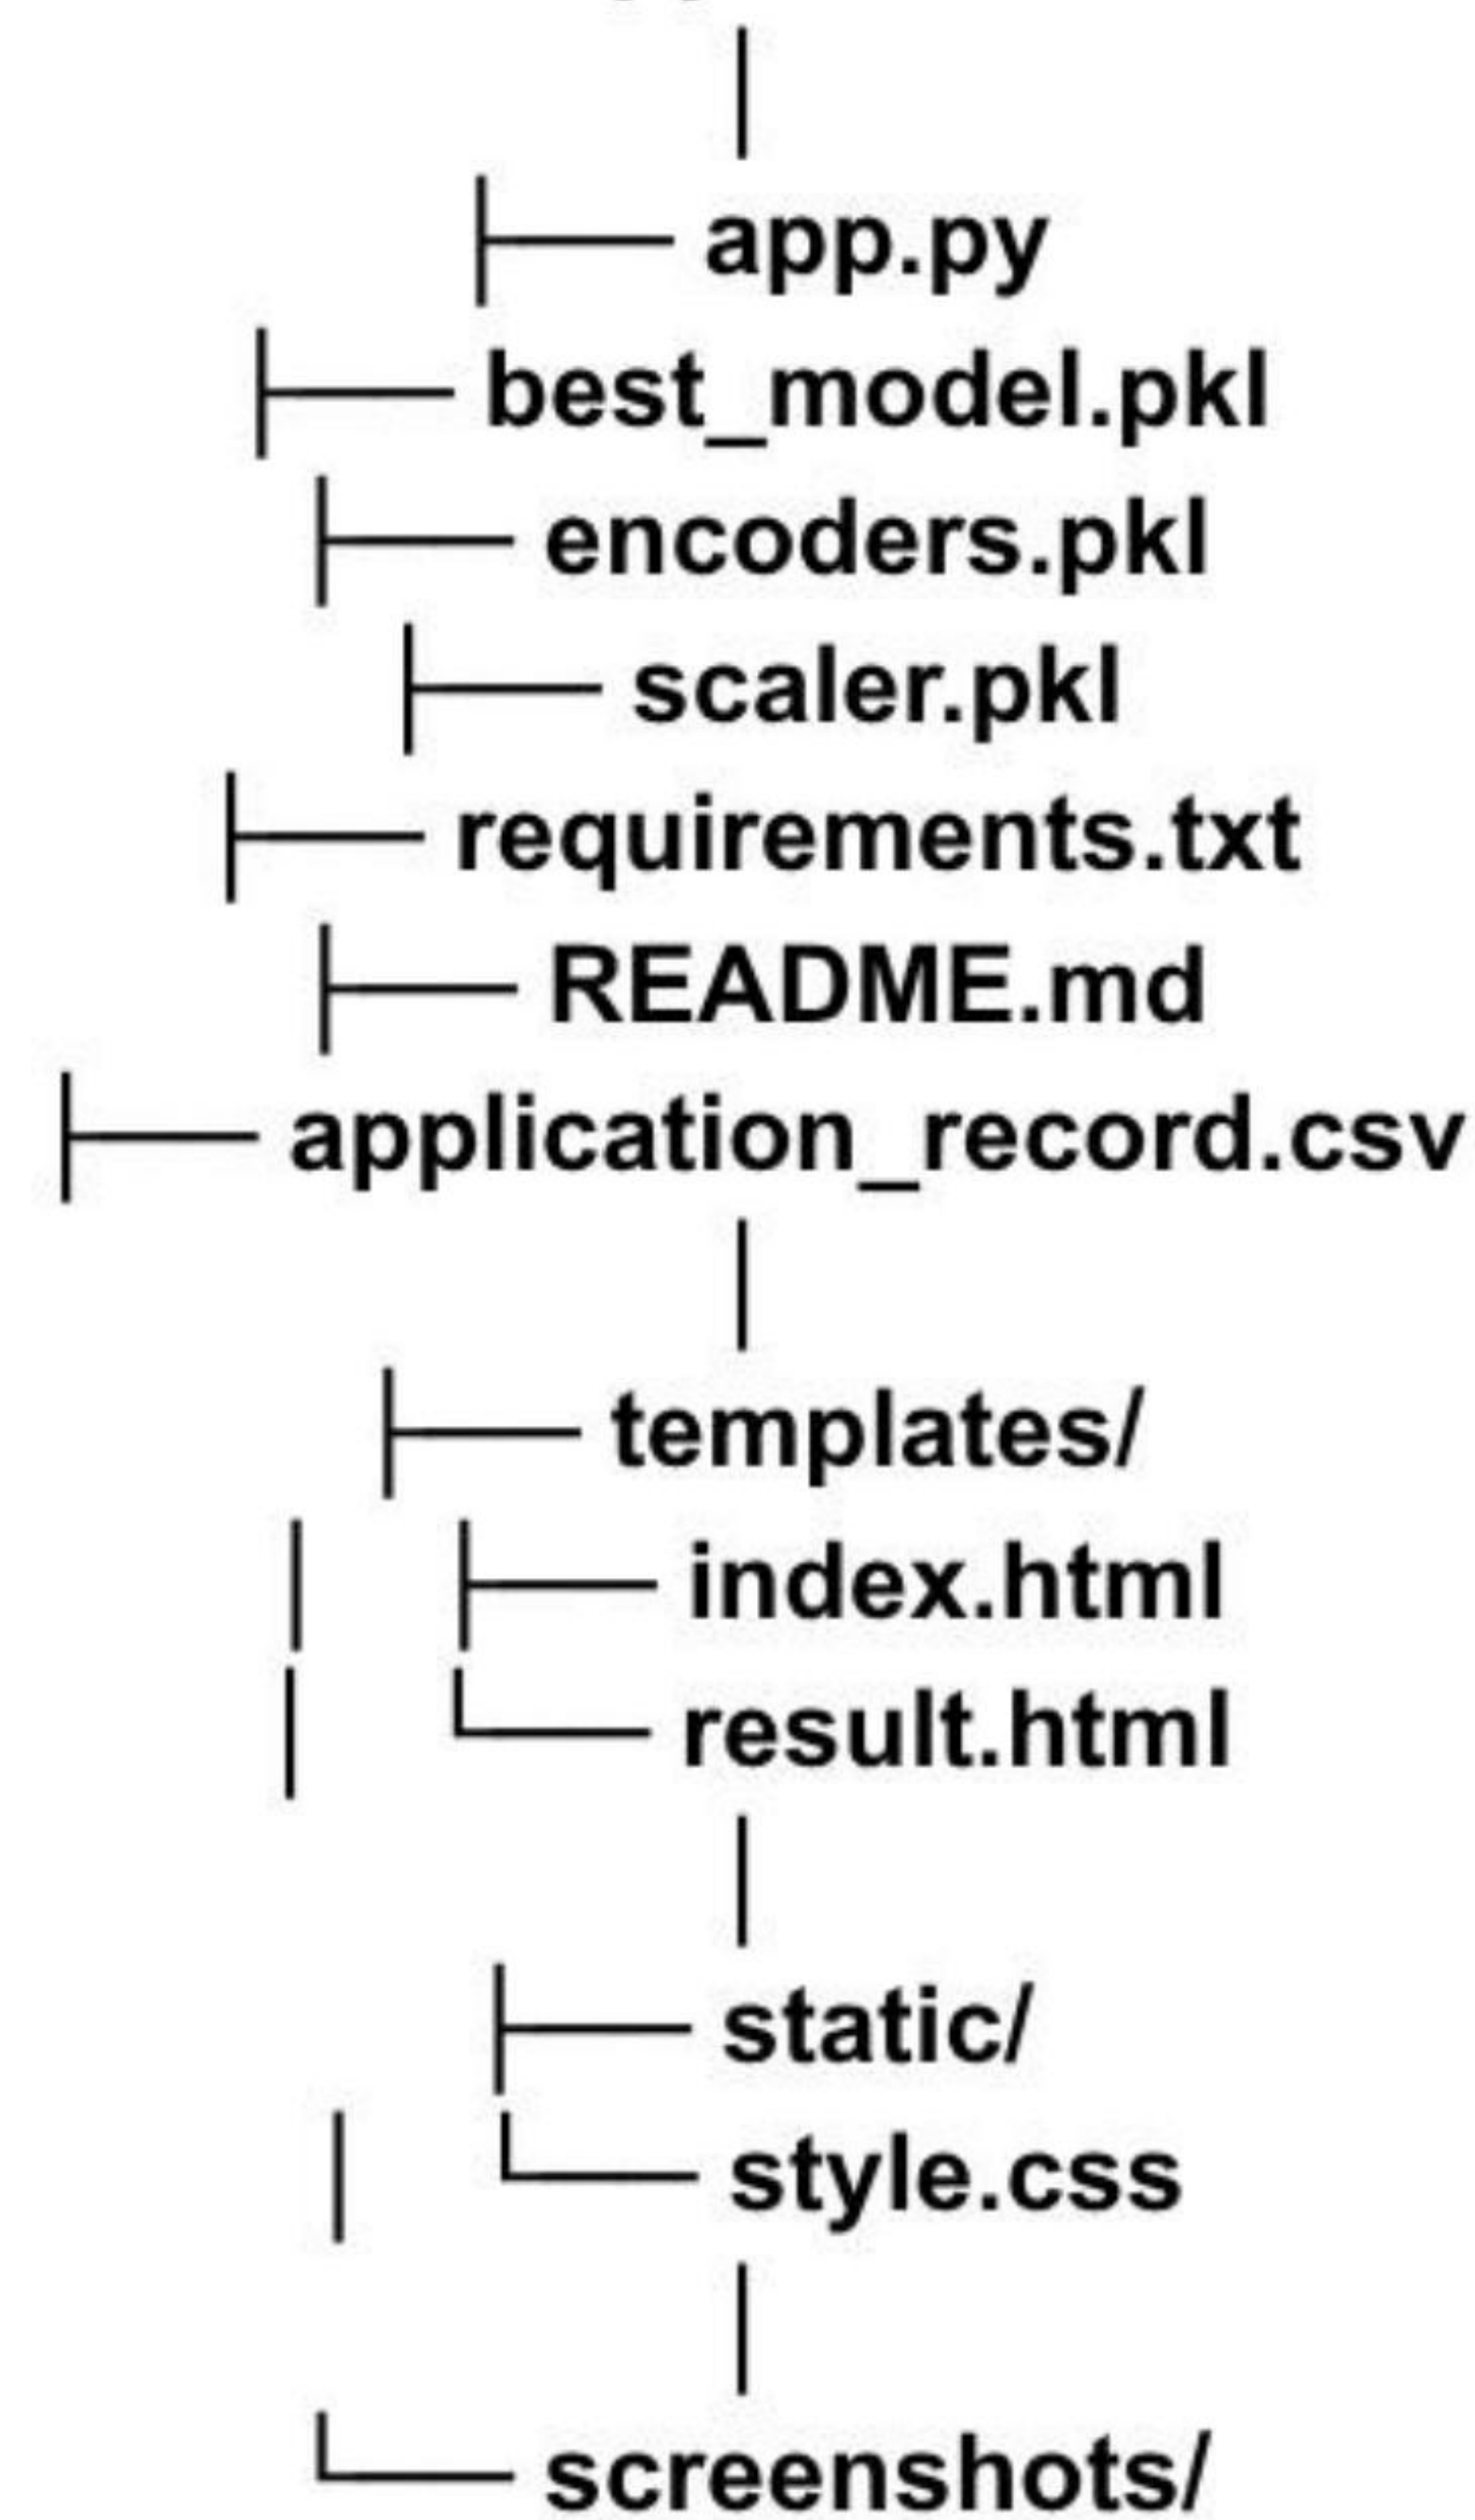

Step 1: Submission Checklist

S.No	Item to Submit	Submitted
1	Complete Source Code (app.py, templates, static, model files)	Yes
2	README / Setup Guide	Yes
3	requirements.txt	Yes
4	Database Schema / Seed Files	NA
5	Environment Configuration File (.env)	NA
6	Deployed Application URL	No
7	Executable Binary / APK	NA
8	Dockerfile	NA
9	Test Files / Test Results	Yes
10	Demo Video	Yes

Step 2: File / Folder Structure

Provide an overview of your project's file and folder structure below:

Credit-Card-Approval-Prediction/

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed (Local Flask Application)
Login Credentials	Not Applicable
Platform / Hosting Provider	Local System (VS Code + Flask)
Repository Link	https://github.com/ksangeeth9391/Credit-Card-Approval-Prediction.git
Demo Video Link	Google Drive / YouTube Link (after uploading)

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run your project locally:

Step 4: Run Instructions

Install Python 3.10 or above.

Install dependencies:

`pip install -r requirements.txt`

Open the project folder in VS Code.

Run:

`python app.py`

Open the browser and visit:

`http://127.0.0.1:5000/`

Enter applicant details and click Predict.

The system displays Approved or Rejected.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	Requires trained model files (best_model.pkl, encoders.pkl, scaler.pkl)	Keep all model files in the project folder
2	Prediction depends on input data quality	Enter valid applicant details
